

Shower Solutions by Tiles and More Ltd.

Building board solutions, some samples:

using different thicknesses in boards for construction and cladding of bath tubs

as cladding and construction...

as partition wall...

using to create up-stands on showers...

and creating vanities...

creating vanities and shower walls, which are strong as...

before renovation....

after renovation...

can be used as wall liners, either directly on timber studs or on top of existing linings

after reinforcing all joints panel can be plastered or tiled over...

because the building board is water resistant, won't swell or twist, it can be used for outside solutions, here a shower-bath tray
